

Resume Gap Analysis Report

Resume: Madhav_NVIDIA_Resume.pdf

Embedding Fit Score	2.4/100
LLM-Assessed Score	45/100

Note: these two scores measure different things and can legitimately disagree — the embedding score reflects vector similarity to the job description, while the LLM score reflects Gemini's qualitative judgment of the same matched content.

Strengths

- Pursuing a B.Tech in CSE (AI & ML) based in Noida, matching the target location
- Possesses foundational technical skills including Python, DSA, OOP, Git, and API Integration
- Demonstrated interest in AI/ML through hackathons and workshops
- Has internship experience at HCLTech and MNNIT Allahabad

Gaps

- No mentioned experience with LLM frameworks like LangChain, LlamaIndex, or Hugging Face Transformers
- Lacks experience with vector databases such as Qdrant or ChromaDB
- No listed knowledge of FastAPI, Flask, SQL, or cloud platforms
- Missing experience with Docker, Kubernetes, and CI/CD pipelines
- Expected graduation is 2027, which may not meet the immediate full-time requirement

Suggestions

- Build and showcase personal projects utilizing LangChain, LlamaIndex, and vector databases
- Learn FastAPI to gain experience in building and deploying REST APIs
- Acquire hands-on experience with Docker and basic cloud services (AWS/Azure/GCP)
